

FOR IMMEDIATE RELEASE

SWIF Rack Partners with National Roofing Partners to Deliver Nationwide C&I Installation and Roofing Services

Strategic alliance pairs SWIF Rack's advanced solar mounting solutions with NRP's extensive network of tier 1 commercial roofing partners across North America.

PORTLAND, Ore. & DALLAS, Texas, August 24, 2026 — SWIF Rack, a leading innovator in commercial and industrial solar mounting and racking systems, today announced a strategic partnership with **National Roofing Partners (NRP)**, the nation's premier single-source national commercial roofing contractor.

Through this collaboration, SWIF Rack clients across the United States will gain access to NRP's nationwide footprint of elite, certified commercial roofing professionals. The partnership streamlines the deployment of commercial solar installations by offering end-to-end support—from preliminary roof assessments and precise rack mounting, weatherproofing, and long-term roof warranty maintenance. This collaboration expands on SWIF Rack's existing distribution partnership with Duro-Last®, a member of the Amrize family of brands and a leading manufacturer of custom-fabricated single-ply roofing systems. By teaming up with NRP, SWIF Rack further expands the resources and network of expertise available for roof-integrated solar projects.

As commercial solar adoption continues to accelerate, building owners and EPCs (Engineering, Procurement, and Construction firms) increasingly require integrated solutions that protect roof membrane integrity while maximizing solar energy yield. The SWIF Rack and NRP alliance directly addresses this need, ensuring that every solar array is paired with rigorous roofing craftsmanship and backed by full warranty protections.

Key Highlights of the Partnership:

- **Nationwide Deployment:** Rapid scalability and consistent execution for multi-site commercial solar portfolios across all 50 states.
- **Warranty Preservation:** Seamless integration of SWIF Rack mounting hardware with single-ply, metal, and modified bitumen commercial roof systems without compromising existing roof manufacturer warranties.
- **Turnkey Execution:** Coordinated logistics, site assessments, structural attachment, and ongoing operations & maintenance (O&M) support.
- **Risk Mitigation:** Enhanced site safety standards and specialized engineering oversight tailored to complex industrial rooftops.

Leadership Quotes

"Our priority at SWIF Rack has always been delivering engineered racking systems that combine strategic installation with uncompromising structural integrity. Partnering with National Roofing Partners allows us to offer our clients a seamless, turnkey experience anywhere in the country. NRP's deep commercial roofing expertise ensures that every SWIF Rack deployment protects the underlying building asset while maximizing clean energy performance."

— **April Chen, Chief Executive Officer / Founder at SWIF Rack**

"I see tremendous value in expanding National Roofing Partners' coast-to-coast capabilities to include the certified installation and maintenance of PV systems using SWIF Rack. NRP's expertise installing and servicing Amrize's portfolio of roofing products—combined with Amrize's role through their Duro-Last Brand as SWIF Rack's distribution partner in the roofing industry—makes this a natural fit. Drawing on more than 40-years of roofing experience and 28-years integrating solar PV with commercial roof systems, I anticipate this collaboration will elevate commercial standards throughout the solar industry. It will do this by seamlessly delivering coordinated, roof-integrated PV solutions that prioritize the building envelope and provide greater long-term 'Roof As An Asset' value to building owners."

— **Thomas H Desimone, Senior Business / Project Developer at SWIF Rack**

"Solar strategy is an increasing driver in modern commercial facilities management, but a solar array is only as reliable as the roof beneath it. By partnering with SWIF Rack, we are combining high-performance solar racking technology with our nationwide network of top-tier commercial roofing professionals. Together, we provide building owners with total peace of mind—delivering flawless installations while safeguarding their roof system."

— **Austin Fennema, Vice President of Revenue at National Roofing Partners**

About SWIF Rack

SWIF Rack is a premier provider of innovative, engineered mounting and racking systems for commercial, industrial, and utility-scale solar projects. Built for rapid deployment, extreme durability, and maximum adaptability across diverse roof types, SWIF Rack solutions optimize installation efficiency while safeguarding building infrastructure.
